

Georgii Seletskii

Data Engineer | Data Analyst

+7 (903) 013-95-84

george.seletski@gmail.com

Moscow

PERSONAL INFORMATION

Citizenship: Russian Federation

Education: Higher (Bachelor's)

Date of birth: 29.05.2000

LANGUAGES

English (B2 – Advanced)

Slovak (B1 – Intermediate)

PERSONAL QUALITIES

- Analytical thinking
- Attention to detail
- Team Interaction Skills
- Focus on results and efficiency

EDUCATION

BA of Applied Maths And informatics

Bauman Moscow State Technical University

Faculty: Faculty of Space Engineering

End date: 2024

PROFESSIONAL SKILLS

- **Python and parsing:** Python 3.x, BeautifulSoup, Playwright, Selenium, PyTest.
- **Databases and SQL:** PostgreSQL, MySQL, SQLite; extract, clean, merge, and prepare data.
- **Data Engineering:** Airflow, Docker, DBT, Git, basic CI/CD processes, logging and task monitoring.
- **BI and reporting:** Power BI, Yandex DataLens, Excel.
- **APIs and formats:** REST API, Flask basic, JSON, XML; R baseline; Linux: Terminal.

WORK EXPERIENCE

Rev Ritter – Senior Analyst

March 2025 – Present

- Developed and maintained Python parsers for regular data collection from external sources.
- Added logging, error handling, and task execution control to improve the reliability of data collection.
- He supported Airflow pipelines: he tracked the statuses of DAG tasks, analyzed failures, and monitored the regularity of processes.
- Wrote SQL queries to extract and combine data from different sources into a single analytical report.
- Automated regular reporting and data preparation for managers, analysts, and business customers.
- Configured and maintained the architecture for data collection, and documented the entire configuration and support process.

Magram Market Research — Junior Business Analyst

August 2024 – September 2024

- Prepared the questionnaire data for analysis: removed duplicates, processed gaps, normalized categories.
- Used R, Python, and SQL to prepare datasets and analytical samples.
- Prepared reports and visualizations for a team of analysts and business customers.

GenX – Junior Python Developer***June 2023 – August 2023***

- Developed a prototype of a tool for storing and managing data, compatible with the G4GH Data Repository API.
- Automated data loading and processing using Python, Docker, and SQL.
- He participated in the development of automated reporting and monitoring of key indicators.
- He coordinated technical solutions with the analytical tasks of the interdisciplinary team.

CheapTrip – Junior Python Developer***March 2022 – May 2022***

- Implemented automated testing using PyTest, which reduced the number of bugs in applications by 25%.
- Automated the processes of collecting and processing data from various sources, which reduced the time spent on analysis from 10 hours to 2 hours per week.
- Worked with business analysts to refine the requirements for internal automation projects, contributing to the successful implementation of projects on time.
- Prepared analytical reports for internal use with recommendations for process optimization, which led to a 10% increase in the efficiency of internal operations.

MTS Group*Data Analyst Intern****August 2021 – November 2021***

- Automated the generation of reports in Excel and Python.
- Analyzed network data to find bottlenecks and prepare proposals for network optimization.
- Visualized key network metrics in Tableau for operational analysis.
- He conducted a cohort analysis.
